

2021 Vereinte Nationen Dekade
2030 der Meeresforschung
für nachhaltige Entwicklung

The UN Ocean Decade aims to develop the foundations for sustainable protection of the oceans. The United Nations initiative is focusing on the goal of conserving and using the oceans, seas and marine resources for sustainable development. Underwater life is not only important to the people who live off and live with the oceans. These waters play a key role for the future of the global climate and biodiversity on earth. The German Oceanographic Museum is participating in the UN Ocean Decade with a variety of events and activities.

Delve into the unique underwater world of the northern seas with the 50 impressive aquariums and large interactive exhibitions of the European Museum of the Year 2010.

Exhibitions

World Ocean – Diversity of Life in the Sea

Dive below the ocean's surface and discover an underwater world with fascinating biodiversity.

Baltic Sea Exhibition

The sea at our doorstep takes centre stage: explore detailed habitat reconstructions, masterfully prepared biological specimens and a modern light table.

Exploration and Utilisation

A virtual dive takes visitors down to the black smokers on the seafloor. Find out more about marine natural resources, global warming and ocean overfishing.

1:1 Giants of the Sea

This breathtaking exhibit was developed in cooperation with Greenpeace and displays life-sized whales and other giants of the sea suspended from above. Visitors gaze upward through the virtual ocean while they lay back on the 'seabed'.

Aquariums

Baltic Sea Tour

Your underwater journey begins in the Stralsund harbour and takes you across the central Baltic Sea to the Kattegat. Discover jellyfish, rays, lumpfish and swarms of shimmering herring.

North Sea & North Atlantic Tour

Stroll from the Wadden Sea through the Helgoland aquarium tunnel to the open Atlantic! The oceanic aquarium with an impressive model of a shipwreck holds 2.6 million liters of water and is populated by rays, sharks and schooling mackerel.

Children's Sea & Penguin Exhibit

The children's play corner has a lighthouse climber and lifelike beach mural. Humboldt penguins live on the roof terrace next door. These agile feathered swimmers can be observed through large windows.
